## THE PATHS OF RONCEGNO BETWEEN HISTORY AND TRADITION

*The paths described here and made available to people are located in two areas of the municipality: north of the historic center we find a route going through centuries-old chestnut groves and Masi, and in Cinque Valli a loop path surrounded by a mountain forest. Along these routes, in the vicinity of characteristic sites, a number of installations with descriptive panels allow visitors to explore the themes and peculiarities of the area. In the mountains, the history of the Great War, the old mines and the description of the natural environments are dealt with, while along the paths and lanes above the village of Roncegno, the cultivation of chestnut groves, the traditions linked to the Masi and the history of the Roncegno thermal waters are described. The Chestnut circuit is about 11 km in length and 300 m of altitude difference, and it is divided into three loops, while the Cinque Valli loop path measures about 6.5 km in length and 200 m of altitude difference. The two routes are connected by 6.6 km of Cinque Valli municipal road.*
